Wayne/Terry,

In response to your requests below.

1. I will begin working with the team to provide draft reports of the two data packages for the two Sr-90 exceedances.
2. I have received all reviewers final remarks and will send this last data packages to you all today.
3. The RSY Pad singled out pending static measurements is not unique compared to the remaining 16 RSY Pads in progress. In retrospect I could have eliminated that bullet. Sorry for the confusion.

Very Respectfully,

Liz Roddy

Liz –

Thank you for the additional data packages.

1. We support Terry's request for the data packages containing the two Sr-90 exceedances. I understand the Navy plans remediation and additional sampling at the RSY pads/lifts with the exceedances, but don't see why that should delay sharing the two data packages.
2. Also, you mention the Navy has received one other data package that has not been shared with the agencies. Are you planning to send?

3. Lastly, you mention a RSY pad in need of static measurements. Is there a reason that RSY pad is singled out from others described as in progress?

Subject: RE: N62473-17-D-0006 CTO: N6247318F5065 Parcel G - Soil Data Package TU-107

Hi Liz,

Thank you for sending over all these data packages and providing a summary table. I have received 26 data packages.

Regarding the data packages containing the two Sr-90 exceedances, is it possible to send us those measurement or data you already have? This would give us the chance to evaluate on the existing lab data first, instead of waiting for another few months for the full report or data packages. This way, if we have any comments on the lab results, i.e. using a longer count time to decrease the uncertainty of the measurement, the recommendations can be applied to any additional soil sample collection or analysis related to these two exceedances.

Please let me know what your thought on this suggestion.

Thank you very much!

Best,

Terry

Terry,

To confirm there are 27 complete RSY pad packages to date. As of today, you should all have 26 of them.

There are currently 46 RSY pad lifts with material at the site.

- Twenty-seven (27) of those pads are complete, and the packages have been submitted to the Navy
- Two (2) of the RSY pads have Sr-90 exceedances, and need to be remediated and bounding samples collected. We have discussed these in the weekly meetings. Data packages will be available once bounding samples have been collected and analyzed. This is pending remobilization.
- One (1) RSY pad needs the static measurements collected. This is pending remobilization.
- Sixteen (16) RSY pads are in progress, not full, and/or not radiologically processed

I got those 4 reports, R11U2, R11U3, R40U1, and R40U2 from you this morning. Thank you very much, Liz.

Thanks also for the summary on the data packages.

Does it mean that there were in total 27 lifts excavated from Parcel G before APTIM's pause a few months ago?

Thanks,

Terry

Terry,

Thanks for confirming your receipt of the data packages. The list below is correct. In addition to this list I sent out 4 more data packages this morning which include: R11U2, R11U3, R40U1, R40U2.

In total I have 6 pending reports to submit to you all and then you will have everything we have received to date. This would total 27 reports. Until we remobilize in May and begin collecting samples again there are no further reports available.

Let me know if you have any further questions.

Very Respectfully,

Hi Liz,

Thank you for sending over these data packages, especially you resending the files individually due to the limitation of attachment file size.

In total, I have received the revision of 11 data packages (RSY18Use1 [R18U1], R20U2, R29U2, R20U3, R1U1, R1U2, R11U1, R12U1, R15U2, R29U1, R31U2) and 6 new data packages (R31U1, R30U1, R32U1, R35U1, R35U2, R38U10). Please let me know if this list looks correct to you.

In addition, do you know how many lifts are there on each RSY pad currently and how many data packages we have not received among those lifts?

Thank you very much!

Best,

Terry

Dear Wayne, Nina and Terry,

To support the agencies oversight/split sampling effort and as a curtesy of information sharing, attached you will find the Soil Data Package for Parcel G Phase 1 TU-107.

Please let me know if you have any questions.
